

■ Multi Spray 1000

Aerosol - 500ml

Multi Spray 1000 is a light lubricant with strong moisture repelling properties that loosens heavy moving parts and protects against corrosion. The product repels moisture by permeating between the surface and the water, and therefore protecting the surface.

Electrical connections are usually found in places where they are exposed to the effects of weather, dirt, grease and salt. Due to the protective action of Multi Spray 1000 corrosion can be prevented to sockets, electrical connections, battery poles, distributor caps and ignition systems.

Electrical contacts already dirtied or affected can be cleaned effectively first with Contact Clean, before applying Multi Spray 1000 for effective protection.

Multi Spray 1000 is a perfect product for protecting plastic parts against weathering. Thanks to the product's penetrating power, weathered plastic can be restored to its original condition. Multi Spray 1000 gives the plastic a natural shine in the process.

Multi Spray 1000 is 100% silicon free and therefore ideal for use in bodywork repair shops and spray shops.

Thanks to its aerosol packaging Multi Spray 1000 is extremely user friendly and easy to apply. The extra nozzle and tube supplied with the product make it very easy to apply in places which are difficult to access.

Properties:

- Ideal as a lubricant for locks, tools, cables, etc.
- Keeps rubber and plastic supple and smooth without silicones.
- Cleans and protects tools, engine parts, skis, boats, machinery, etc.
- Protects electrical connections for a very long time.
- Silicon free!
- Perfect for use in difficult-to-access places.
