

Innovative and environmentally friendly solutions for the Marine Industry

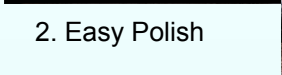

CLEANING

Easy Clean

Is a professional liquid cleaner for use on just about any kind of surface. It removes nicotine, grease, dirt, dust, salt and silicone.

1. Easy Clean

2. Easy Polish

3. Buffing with spot pad

- Can be used on plastics, rubber, textile, canvas etc
- Easy to use
- Cleans and protects
- Bio degradable

Easy Polish

Is a unique polish designed with the latest technology. It's unique composition means 50% of its components clean and polish while the other 50% provides a protective layer

REPAIR

Repaplast

Is a dual component product especially designed for the quick repair and gluing of plastics, metals and almost every type of modern synthetic.

Due to fast drying time, further work i.e. sanding, painting, can be carried out after just 10-15mins.

- Bonds to most plastics, metals and wood
- Resistant up to 100°C
- Remains flexible / not brittle
- Polyurethane
- Plastic repair 1000's of uses
- Perfect for cracks and stripped threads

MAINTENANCE

Inno-Lock

Is a strong locking compound for fine threads. Thanks to the practical pump-bottle the thixotropic material is easy to apply.

- Non drip gel
- Precision applicator
- No wastage
- Vibration resistant
- 3 different strengths

CC Marine and Industrial Supply Ltd

Unit 25 Universal Marina
Crableck Lane
Sarisbury Green
Southampton

Fax: +44 (0) 1489 580035
Email: sales@cc-marine.co.uk

Marine distributor for Innotec
in the UK

ADHESION

Adheseal

Is a MS Polymer based glue and sealant that retains its elasticity. It provides perfect adhesion to many difficult surfaces such as plastic, metal, rubber, glass etc

- Can be used above and below the waterline
- Emergency and permanent repairs– cures in water
- Easy to apply and use
- Will not go hard in tip/ tube therefore no wastage
- Will not crack or shrink

Quick Bond and Activator

Is a unique product especially designed for the quick repair and gluing of metals and almost every type of modern synthetic materials. Cures in 30 minutes without the need for an activator.

- Quick drying
- Easy to use
- Clear (colourless)
- Two part product allows parts to be aligned correctly first

LUBRICATION

MS1000

Is a light lubricant with strong water repelling properties while protecting against corrosion.

- Repels water on electrical parts in extremely wet conditions
- Inhibits corrosion
- Keeps rubbers and plastics supple
- Silicon Free

De Block Oil

Is a mix of quick rust dissolver, lubricants and graphite, which has high penetrating effect due to its low surface tension and is therefore perfectly capable of releasing seized parts

- Capillary action
- High penetrating
- Rust dissolving lubricant
- Loosens seized parts

CLEANING

Innoplast Cleaner Innoplast Protector

Innoplast Cleaner is a specially developed liquid cleaner for almost any type of plastic. Because of its unique composition, this product removes tenacious contamination, such as remaining polishing agent, scum and rust marks, by cleaning deep down to the pores. **Innoplast Protector** is a high-grade protection product for almost any type of plastic. It protects using no silicone, no wax and no alcohol, and does not leave a greasy layer.

- Cleans ribs and other materials
- Restores and protects
- Silicone free
- Handy applicator for economic use
